

**DANA**  
**AGRONOMICS**

**Engineering Specialized in Medicinal Cannabis & Hemp Crops**

## DANA AGRONOMICS S.L.

- **Vision**

Hemp is a strategic piece in a better and more sustainable world. Cannabis has enormous therapeutic and medicinal potential. Its importance as a geopolitical and economic level is increasingly evident. Dana Agronomics is part of this (r) evolution.

- **Undertaking**

Our knowledge at the service of your passion. Dana Agronomics is one of the leading companies of technical advice on the cultivation and transformation of Cannabis sativa L. both for pharmaceutical and industrial use. We have sizeable personal experience and have developed over the last few years various R + D + I projects, Cannabis plant breeding, vertical product development, etcetera; both nationally and internationally.

- **Key values**

1. **Quality:** The experience and knowledge of our team, along with the passion and dedication of all the members of Dana Agronomics, form the perfect breeding ground for our work to have outstanding quality.
2. **Integrity:** we do not understand business if it does not go hand in hand with ethical principles.
3. **Teamwork:** to offer the best services to our clients, all the skills and abilities of the members of the Dana Agronomics team are required.

4. **Win-win relations** ∴ Both for customers and employees, no business can aspire to last for many years if only one party wins.

5. **We only have one "boss"**: the needs and requests of our clients.

6. **Collaboration**: prioritise collaborative relationships and not a competition between the rest of companies in these sector and us.

- **Our Company.**

Dana Agronomics is a company established since 2014 and led by Xaquín Acosta and Jesús Díaz, two experts with extensive experience in both the medicinal cannabis sector and the industrial hemp sector.

Initially focused on agronomic engineering services, we currently cover more technical aspects related to the plant, such as chemical, industrial, legal, etcétera.

- **Team.**

Our technical team is broad, multidisciplinary, and continuously evolving. Composed by agricultural engineers, graduate in environmental sciences, industrial engineer, and doctor in agricultural chemistry; covering all the essential aspects to be able to carry out a company with these characteristics.

- **Strategic partners.**

We live in a world full of possibilities and interconnections that we love to explore. We are open to discuss any alternative professional collaboration that may arise, both with other companies and independent technicians. We are very interested in contacting well-established transformative industries to explore potential paths of cooperation for mutual benefit.

- **Medicinal Cannabis & Industrial Hemp**

We are experts in the cultivation of industrial hemp and the medicinal Cannabis with more than 15 years of expertise in this industry: at all levels from crops grown outdoors, greenhouses or indoors.

As we have mentioned before, we have a multidisciplinary and talented team of capable of planning, designing, managing and supervising all phases of your business Project, from an agronomic and technical perspective.

On the other hand, we are not mere field advisors, but we go a step further: comprehensive advice (nutrition, pests, diseases, weeds), we are determined to offer you the best facilities suitable for your operation, solving your processing and transformation issues; maximizing its benefits and establishing a solid foundation for the prosperity of your business.

- **R+D+I**

The research activity covers both agricultural and environmental projects. The improvement of the efficiency in the productive processes, energetics and consumption of raw materials, through the rational and practical use of the resources in the production respectful with the environment, as well as the development and adaptation of new production technologies.

- Management of administrative procedures; Department of agriculture; Spanish Agency of Medicines and Health Products (AEMPS); Spanish Agency of Consumption, Food Security and Nutrition, etcetera.

- Plant Breeding, both at the level of experimental design and development of projects related to the improvement of varieties for both medicinal and industrial use.
- Pre-projects and Projects specialised in crops of industrial hemp, medicinal Cannabis and new emergent plants.
- Advice on crop management
- Other services, such as agricultural appraisals or expert reports related or not to the cultivation of industrial hemp.

- **Brokerage**

We mediate, manage, supervise purchase and sale contracts offering solutions and products of the highest quality, appropriate to the needs of the client. Guaranteeing productions, product and prices. The research activity covers both agricultural and environmental projects.

The improvement of the efficiency in the productive processes, energetics and consumption of raw materials, through the rational and practical use of the resources in the production respectful with the environment, as well as the development and adaptation of new production technologies.

- Management of administrative procedures; Department of agriculture; Spanish Agency of Medicines and Health Products; Spanish Agency of Consumption, Food Security and Nutrition, etcetera.
- Plant improvement, both at the level of experimental design and development of projects related to the advancement of varieties for both medicinal and industrial use.

- Pre-projects and Projects specialised in crops of industrial hemp, medicinal Cannabis and what are called new emergent crops.

- **Brokerage**

We mediate, manage, supervise purchase and sale contracts offering solutions and products of the highest quality appropriate to the needs of the client. Guaranteeing productions, product and prices.

- **Court Expert services**

In most of the seizures of cannabis plants, several errors are committed, both in terms of protocol and in estimating the amount of cannabis suitable for consumption as a narcotic drug. Irregularities are quite frequent in police actions and the staff of the laboratory itself and more common than they should be because the freedom of the investigated is at stake.

We are pioneers in this field with more than 17 years of experience. The preparation of the Expert Report has always been positive, achieving absolution most of the time.
